

Athena Backup™

smart. secure. flexible.

Protect Your Digital Life.

Explore Anytime, Anywhere.

Athena Backup is the smart choice for protecting your irreplaceable files. With Athena Backup, your precious photo collection and sensitive personal data are secure and protected from computer failure, fire, flood, and theft. Enjoy complete freedom with access to your files from anywhere at anytime; whether you're in an internet cafe with your smart phone, at an important client meeting or online at Grandma's.

Be Smart

Athena Backup is sophisticated yet simple to use. Just set it up and walk away and let us take care of the rest. Hassle-free technology finds your entire photo collection on each and every Windows and Macintosh computer in your home. Athena Backup works continuously in the background protecting your irreplaceable files.

Be Secure

Athena Backup is completely secure and totally private. You can rest easy knowing that your data is stored in secure, redundant data centers - your photos, music and documents belong to you and no one else.

Be You

Athena Backup is focused on backup, it's what we do. We take care of finding and protecting your photos. You take it from there. Explore your photos and other files without the need for cumbersome, time consuming uploads. Your secure Personal Digital Vault is always there waiting for you.

Athena Backup™

smart. secure. flexible.

What is my Personal Digital Vault?

Athena Backup stores all of your files in your Personal Digital Vault (PDV). Just log in to your Athena Backup account from anywhere at any time and all of your files, from all of your computers are together in one place... yours to search, browse, download and share. It's what separates Athena Backup from the rest – Protect your digital life. Anytime, Anywhere.

System Requirements

- 512 MB RAM
- Windows XP, Windows Vista or Mac OS-X 10.4 (Tiger) or higher
- 350 MHz CPU or better
- Broadband Internet connection

Smart

- Protect all of the Windows and Macintosh computers in your home with one account and one low monthly fee.
- Finds your entire photo collection across all of the computers in your home and backs them up to secure data centers.
- Work uninterrupted as your files are automatically and continuously backed up.
- Your critical work comes first. Whether you are editing images or sending email, Athena Backup is working to protect your data. It will not interfere with the critical operation of your computer.
- Set it up and walk away. Athena Backup constantly monitors your files so changes are instantly backed up.
- Protect yourself from file corruption or accidental deletion with easy access to past versions of your files.
- Choose to pause your backup at any time, leaving all your Internet bandwidth and CPU resources available to other programs.
- No need to worry about shutting down with Athena Backup running, it will automatically resume when you next boot up.
- Run your backups continuously or choose to schedule them yourself.
- Configure Athena to use as much or as little of your Internet bandwidth as you wish.
- File fragmentation technology makes for quicker, more efficient backups since only the changed fragments of the file need to be backed up.

Secure

- Your files and personal information are completely private and secure.
- Athena Backup encrypts your data using the Advanced Encryption Standard. AES is widely used in business and is approved for securing classified data by the US government.

- Each file fragment is encrypted individually and stored in a separate location
- Use two levels of password security to ensure complete protection of your private data.
- Athena Backup does not sell any customer information, nor will we examine the contents of files being backed up.

Flexible

- Simplify your life. Access your photo collection and other important files from multiple computers in your private secure Personal Digital Vault.
- Share your photos and other personal files with friends and family using the Personal Digital Vault Explorer.
- Enjoy complete freedom and flexibility. Access and download your photos and other important files from any computer or mobile device.
- Easily restore your files to any Windows or Macintosh computer regardless of the file's origin.
- Restore your files to any computer, allowing you to easily transfer all of your data to a new computer.
- Restore a specific file or choose to restore an entire computer.
- Major file restorations can occur over long periods of time, even between computer shut downs.
- Innovative storage overview and progress displays provide constant feedback and the assurance that your backup is running properly.
- A monthly Account Activity Report showing your personal computer and storage status gives you complete confidence that your backups are running properly and working for you.
